DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 11, 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In reviewing the specification in detail, it appears the writing processing is not precedently executed over the reading process, and the printing process (the way the claim is written appears that the writing process is executed precedent to all other process being claim. Specification only disclosed the writing process is executed precedent to the generating process (specification, S12, fig. 12).

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 11, 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As discussed in the interview on 6/26/2006, the writing process waiting to be processed cannot be executed precedently over the executed writing process.

The claimed in the current form appears to include the limitation that writing process waiting to be processed is executed precedently over the executed writing process, which is impossible.

Response to Arguments

5. The remark filed on 7/5/2006 has been considered.

Some suggestion to the applicant that would place the application in condition for allowance is for example, by replacing the paragraph "wherein said writing process is controlled...predetermined quantity" with "wherein said unexecuted writing processes are controlled to be precedently executed, over the unexecuted generation processes, by a CPU in case a stored quantity of unprocessed requested for printing generated by an execution of said generation process by said CPU is equal to or more than a predetermined quantity."

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2625

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
